Descripción proporcionada por fabricante

Three years of production, three years of success: this is the story of the 59'Mercurius. As in Riva tradition it is essential to have a constant evolution in its products, in particular for those that record a good response from the market, it is now time for the Mercurius to be accurately restyled. In this way the Mercurius Super was born, reshaped in its external lines and in its electronic equipment, able to confirm and boost the already great performances, which are now even strengthened from the navigation and silence points of views. In particular, the new line of the air intake, the colour of the hull available without any additional cost, the lay out of 2 or 3 cabins to satisfy the different requirements of the Riva ship owners, the wide cockpit covered by a large sun canopy, confer to this yacht a unique style, characterized by a high level of elegance (both inside and outside) and by a unique use of the spaces for its category.
